WORK EXPERIENCE

National Railroad Passenger Corporation – Amtrak

Senior Revenue and Capacity Analyst

Washington, DC

September 2022 – Present

- Developed and implemented alternative inventory-management strategies and spoil controls to identify and generate more business opportunities by stimulating demand and driving revenue growth.
- Developed new statistical and data-reporting tools for an effective and continuous oversight of strategies and spoil controls' performance to avoid revenue dilution and inventory spoilage.
- Developed framework for market analysis, demand forecast, and an inferential simulation for the implementation of a mapping logic for the new pricing structure (9RBDs) avoiding disruption in business operations.
- Improved existing data visualization tools and create new data analysis frames that includes more detailed information of every assigned route and train, such as section and market analysis, time-series analysis, among others for enhancing capabilities by reducing data bias for generating unbiased business decisions.
- Proactive participation and contribution on evaluating and formulating recommendations of current methods and business procedures, such as promotions, inventory management system, and other programs and products.
- Distinguished by senior leaders for achievements in generating more than 12 percent in consecutive year-over-year growth in ridership and revenue.

Internal Revenue Service – IRS

Account Management Specialist

Denver, CO

August 2022 – September 2022

- Managed the performance oversight of the process of taxpayers' data account inquiries and updates, executed by the contact representatives, by providing general information in tax law, taxation procedures, and available resources.
- Recommended a frame for an effective sensitive data query, such as the use of a decision tree, useful when the contact representative assists taxpayers on transferring their inquiries to the relevant expert's phone extension.

California Polytechnic State University

Research Assistant

San Luis Obispo, CA

September 2021 – June 2022

- Research Assistant. World Bank Research Project: "Improving Public Sector Productivity in Malaysia." I led a fellow research team in charge of the literature review, collection, organization, and cleaning of proprietary datasets by using Python and Stata. Also, I guided the analysis of the collected data by applying statistical/econometrics techniques and methodologies for interpreting data and reporting conclusions to support analytical work and final reports.

Additionally, I gathered and shaped available data for modeling the impact of public sector productivity improvement in the economy, concentrating efforts in the effects in economic growth.

· Research Assistant Fellow. Working Research Project: "Spending Response to Extreme Weather." I participated in the literature review and in the preparation of a preliminary report of findings related to data analysis from the National Health and Nutrition Examination Survey NHANES databases by using Python and R.

Florida International University
Instructional Assistant

Miami, FL
June 2020 – December 2020

- I assisted students with in-class activities and tutoring sessions of Precalculus, Algebra, and Trigonometry. Also, I collaborated on grading students' assignments, projects, and quizzes.
- I developed strategies for students' learning improvement, which increased "on-risk" students' grades by 60%.

EDUCATION

California Polytechnic State University
